

ALOK TOMAR

Full-Stack Developer · React · Node.js/Express · JavaScript · REST APIs · 9+ Years

aloktomar.dev@gmail.com 8272831603 Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

Full-Stack Developer with 9+ years of experience designing, developing, and maintaining end-to-end web applications across both frontend and backend layers. Translates business requirements into scalable, secure, and maintainable solutions with strong hands-on engineering expertise and a sharp focus on problem-solving. Proficient in HTML5, CSS3, and JavaScript (ES6+); experienced with React.js for building responsive, accessible, and high-performance interfaces. Primary backend experience with Node.js and Express.js for developing backend services, RESTful APIs, and server-side integrations; additionally familiar with Python and Django. Comfortable with relational (MySQL, PostgreSQL) and NoSQL (MongoDB) databases. Skilled in Git, CI/CD workflows, Agile methodologies, and Jira-based sprint tracking. Proven track record of collaborating with cross-functional teams, conducting code reviews, and maintaining engineering best practices to deliver production-grade web applications.

EXPERIENCE

Full-Stack Developer · Apexure India · Remote

Sep 2024 – Present

- Designed, developed, and maintained end-to-end web applications, translating business requirements into scalable, secure, and maintainable solutions across the full technology stack
- Built responsive, accessible, and high-performance frontend interfaces using HTML5, CSS3, JavaScript (ES6+), and React.js — ensuring WCAG compliance and cross-browser compatibility
- Developed backend services, RESTful APIs, and database structures using Node.js and Express.js as the primary framework, with additional exposure to Python and Django
- Integrated third-party services, APIs, and cloud components including CRMs, payment gateways, AWS services, and marketing automation platforms
- Collaborated with UX/UI designers and product teams to implement user-centered features, translating Figma mockups into production-ready interfaces
- Optimized applications for performance, reliability, and scalability — consistently achieving 90+ Lighthouse scores through code splitting, lazy loading, and asset optimization
- Troubleshooted and resolved software defects and integration issues across frontend and backend layers, reducing production incidents and improving system stability
- Participated in Agile workflows, sprint planning, and Jira-based task tracking — ensuring consistent on-time delivery across client projects
- Conducted code reviews and maintained engineering best practices, improving code quality and reducing rework across the team
- Maintained clear technical documentation and system architecture notes to support team onboarding, handoffs, and long-term maintainability

Full-Stack Developer · MounTech Solutions · Remote

Oct 2020 – Sep 2024

- Designed, developed, and maintained full-stack web applications for diverse clients — handling frontend interfaces, backend service development, and third-party API integrations
- Built responsive, accessible, and high-performance UIs using HTML5, CSS3, SASS, Bootstrap, CSS Grid, and JavaScript — applying modern software design principles throughout
- Developed React.js component-based interfaces for dynamic web applications, applying reusable component patterns to improve maintainability and scalability
- Built and consumed RESTful APIs connecting frontend applications with backend services and third-party platforms including payment gateways and CRM tools
- Troubleshooted and resolved software defects and integration issues across multiple projects, maintaining application stability for production systems
- Worked with relational (MySQL) and NoSQL (MongoDB) databases for data modeling, schema design, and query optimization
- Implemented Git-based CI/CD-aligned workflows, conducted peer code reviews, and enforced engineering best practices across the development team
- Managed tasks, sprint planning, and release tracking using Jira in Agile team environments with cross-functional product and design stakeholders
- Maintained technical documentation and system architecture notes to support team onboarding, handoffs, and long-term project maintainability

Frontend Developer · Apexure · Freelance

- Delivered full-stack web projects independently, managing frontend development, backend integrations, and client communication end-to-end
- Built and maintained web applications using HTML5, CSS3, JavaScript, PHP, and MySQL with a focus on responsiveness and performance
- Applied Agile-style self-management for project scoping, sprint-like task prioritization, and timely delivery

Oct 2019 – Oct 2020

Frontend Web Developer · Built by Blank

- Developed responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript with a focus on clean code and scalability
- Translated Figma and PSD design mockups into fully functional, pixel-perfect web interfaces
- Built dynamic websites focused on cross-browser compatibility, mobile responsiveness, and modern software design principles
- Used browser debugging tools (Chrome DevTools) for testing, QA, and performance profiling

Jan 2017 – Oct 2019

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, jQuery, SASS/SCSS, Bootstrap, CSS Grid, Flexbox, Responsive Design, Accessibility (WCAG 2.1)

Backend (Primary): Node.js, Express.js, RESTful APIs (JSON/XML), Server-Side Routing, Middleware Design, npm, Third-Party API Integrations

Backend (Familiar): Python, Django, Django REST Framework — API development, backend scripting, automation tasks

Databases: MySQL, PostgreSQL (Relational), MongoDB (NoSQL), Schema Design, Query Optimization

DevOps & Workflow: Git, GitHub, CI/CD Workflows, Docker (Familiar), Jira, Agile/Scrum, Sprint Planning, Code Reviews, Engineering Best Practices

Cloud: AWS (Familiar), Azure (Familiar), GCP (Familiar) — cloud component integration and deployment

Engineering: Modern Software Design Principles, Scalable Architecture, Performance Optimization, Core Web Vitals, Problem-Solving, Technical Documentation

AI Tools: Claude, ChatGPT, Cursor — accelerate development, code reviews, and documentation workflows

EDUCATION

MCA – Master of Computer Applications · SGRR Institute of Technology & Science, Dehradun2014

BSc (IT) – Bachelor of Science in Information Technology · ITM College, Dehradun2011

12th – Intermediate · Hindu National Inter College, Dehradun2008

10th – High School · Hindu National Inter College, Dehradun2006
