

ALOK TOMAR

UI Engineer · React.js · Component Library Architecture · Custom UI Solutions · JavaScript (ES6+) · 9+ Years

aloktomar.dev@gmail.com 8272831603 Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

UI Engineer with 9+ years of experience architecting and building high-quality, scalable React.js applications from the ground up. Deep understanding of React's core principles — functional components, custom hooks, virtual DOM, rendering optimisation, and advanced state management patterns. Proven track record of designing and implementing reusable, well-documented component libraries that drive consistency and efficiency across product suites. Resourceful and autonomous — skilled at building custom solutions from scratch, avoiding unnecessary third-party dependencies, and customising external libraries when required. Experienced in full module ownership, delivering complex projects end-to-end with minimal supervision. Background in e-commerce UI development adds direct relevance to product-driven environments.

EXPERIENCE

Senior Frontend Developer · Apexure India · Remote

Sep 2024 – Present

- Architected and built complex React.js applications from scratch — designing scalable component structures, state management patterns, and data flow architecture with full module ownership
- Designed and implemented reusable, well-documented UI component libraries from the ground up — ensuring consistency across product interfaces while minimising dependency on external libraries
- Built custom UI solutions independently rather than defaulting to third-party packages — writing purpose-built hooks, utilities, and components tailored to exact project requirements
- Customised and extended third-party React libraries to meet specific project needs when integration was warranted — adapting APIs, overriding internals, and wrapping components cleanly
- Stayed current with the latest React ecosystem — applied React 18 features (concurrent rendering, transitions, Suspense), new hooks patterns, and emerging tooling to production projects
- Optimised rendering performance using React.memo, useMemo, useCallback, and lazy loading — reducing unnecessary re-renders and improving perceived load times significantly
- Took end-to-end ownership of assigned modules — from architecture and implementation to testing, documentation, and delivery — with minimal supervision in a remote environment
- Worked closely with product engineers and design teams to establish a consistent UI vision, implementing interfaces from Figma mockups with pixel-perfect precision

Senior Frontend Developer · MounTech Solutions · Remote

Oct 2020 – Sep 2024

- Led React.js frontend development across multiple e-commerce and SaaS products — owning component architecture decisions and building modular systems reused across projects
- Created and maintained internal component libraries from scratch — building form systems, data display components, modal flows, and navigation patterns as custom, reusable modules
- Managed complex application state using Context API and Redux — designing state architecture for scalability without over-engineering or unnecessary abstractions
- Implemented React Router for multi-page SPA navigation including protected routes, dynamic params, and programmatic navigation patterns
- Customised and adapted third-party libraries to project-specific requirements — modifying component internals, extending APIs, and wrapping external tools with clean interfaces
- Took full ownership of frontend modules — tracked progress independently, delivered on time, and maintained high code quality with peer code reviews and documentation
- Built responsive, cross-browser-compatible interfaces from Figma designs using HTML5, CSS3, SASS, and CSS Grid with zero reliance on UI kits when custom design required it

Frontend Developer · Apexure · Freelance

Oct 2019 – Oct 2020

- Independently delivered frontend web projects end-to-end — from scoping and design review to production deployment and client handoff
- Built component-driven UIs using React.js and JavaScript, with a strong focus on responsiveness, performance, and browser compatibility
- Managed client communication, iterative feedback cycles, and delivery timelines in an Agile-style self-managed workflow

- Frontend Web Developer · Built by Blank
- Jan 2017 – Oct 2019
- Developed responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript with a focus on clean, maintainable code
 - Translated Figma and PSD design mockups into pixel-perfect functional interfaces across desktop, tablet, and mobile breakpoints
 - Established frontend coding standards and reusable CSS patterns that improved consistency across multi-developer projects
 - Used Chrome DevTools for debugging, performance profiling, and layout inspection across all major browsers

TECHNICAL SKILLS

React.js (Deep): Functional Components, Custom Hooks, Context API, Redux, React Router, React.memo, useMemo, useCallback, React.lazy, Suspense, Error Boundaries, Concurrent Features, JSX, Virtual DOM

Component Architecture: UI Library Design & Implementation, Atomic Design, Reusable Component Patterns, Custom Solutions from Scratch, Third-Party Library Customisation

JavaScript (ES6+): Async/Await, Promises, Closures, Prototypes, Modules, Event Loop, DOM APIs — deep core JS without framework dependency

HTML & CSS: HTML5 (Semantic), CSS3, SASS/SCSS, CSS Grid, Flexbox, CSS Animations, Custom Properties, BEM — hand-crafted without UI kits when needed

Performance: React Rendering Optimisation, Code Splitting, Lazy Loading, Core Web Vitals, Lighthouse, Bundle Analysis, WCAG 2.1 Accessibility

Tools: Git, GitHub, npm/yarn, Vite, Webpack (basics), VS Code, Figma, Chrome DevTools, React DevTools

EDUCATION

MCA – Master of Computer Applications · SGRR Institute of Technology & Science, Dehradun	2014
BSc (IT) – Bachelor of Science in Information Technology · ITM College, Dehradun	2011
12th – Intermediate · Hindu National Inter College, Dehradun	2008
10th – High School · Hindu National Inter College, Dehradun	2006
