

ALOK TOMAR

Senior Frontend Developer · React.js · JavaScript (ES6+) · HTML5/CSS3 · Performance · 9+ Years

aloktomar.dev@gmail.com 8272831603 Dehradun, Uttarakhand, India

PROFESSIONAL SUMMARY

Senior Frontend Developer with 9+ years of experience building high-performance, accessible, and visually precise web interfaces. Deep expertise in React.js — including custom hooks, component architecture, state management with Context API and Redux, and rendering optimisation techniques. Proficient in HTML5, CSS3, JavaScript (ES6+), SASS, and modern layout systems (CSS Grid, Flexbox). Strong focus on Core Web Vitals, WCAG accessibility, and translating complex Figma designs into pixel-perfect, responsive UIs. Experienced in Agile/Scrum workflows, Jira-based sprint tracking, and cross-functional collaboration with design and product teams.

EXPERIENCE

Senior Frontend Developer · Apexure India · Remote Sep 2024 – Present

- Architected and developed scalable React.js applications using functional components, custom hooks, and Context API for global state management
- Built reusable, well-documented component libraries following atomic design principles — reducing UI build time across projects by standardising patterns
- Optimised React rendering performance using `React.memo`, `useMemo`, `useCallback`, and lazy loading with `React.lazy / Suspense`
- Implemented responsive, accessible interfaces using HTML5, CSS3, SASS, and CSS Grid — ensuring WCAG 2.1 AA compliance across all deliverables
- Integrated REST APIs into React components using `fetch` and `axios`, managing async state with `useEffect` and error boundaries
- Collaborated closely with UX/UI designers to implement pixel-perfect interfaces from Figma mockups, providing feedback on design feasibility and accessibility
- Participated in Agile ceremonies — sprint planning, standups, retrospectives — and managed tasks through Jira for on-time delivery
- Achieved consistent 90+ Lighthouse scores across projects through asset optimisation, code splitting, and Core Web Vitals improvements
- Leveraged AI-assisted development tools (Claude, Cursor, ChatGPT) to accelerate component scaffolding, code reviews, and documentation

Senior Frontend Developer · MounTech Solutions · Remote Oct 2020 – Sep 2024

- Led frontend development of multiple client-facing web applications using React.js, building modular component systems consumed across projects
- Managed application state across complex UI flows using React Context API and Redux, improving data consistency and reducing prop-drilling
- Implemented React Router for multi-page SPA navigation including protected routes, dynamic route params, and programmatic navigation
- Built responsive, pixel-perfect layouts using HTML5, CSS3, SASS, Bootstrap, and CSS Grid, translating Figma and PSD designs with high fidelity
- Integrated third-party REST APIs within React applications — payment gateways, CRM tools, and marketing platforms — with robust error handling and loading states
- Enforced code quality through peer code reviews, consistent naming conventions, and component documentation within Git-based workflows
- Managed sprint tasks, bug tracking, and feature releases using Jira in a collaborative Agile team environment
- Improved cross-browser compatibility and mobile responsiveness across all deliverables, tested on Chrome, Firefox, Safari, and Edge
- Maintained clear frontend architecture documentation to support onboarding and long-term maintainability

Frontend Developer · Apexure · Freelance Oct 2019 – Oct 2020

- Independently delivered frontend web projects end-to-end — from scoping and design review to production deployment and client handoff

- Built component-driven UIs using React.js and JavaScript, with a strong focus on responsiveness, performance, and browser compatibility
- Managed client communication, iterative feedback cycles, and delivery timelines in an Agile-style self-managed workflow

Frontend Web Developer · Built by Blank

Jan 2017 – Oct 2019

- Developed responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript with a focus on clean, maintainable code
- Translated Figma and PSD design mockups into pixel-perfect functional interfaces across desktop, tablet, and mobile breakpoints
- Established frontend coding standards and reusable CSS patterns that improved consistency across multi-developer projects
- Used Chrome DevTools for debugging, performance profiling, and layout inspection across all major browsers

TECHNICAL SKILLS

React.js: Functional Components, Custom Hooks, Context API, Redux (Intermediate), React Router, React.memo, useMemo, useCallback, React.lazy, Suspense, Error Boundaries, JSX

JavaScript: ES6+, Async/Await, Promises, Fetch API, Axios, DOM Manipulation, Event Handling, Modules, Destructuring, Spread/Rest

HTML & CSS: HTML5 (Semantic), CSS3, SASS/SCSS, CSS Grid, Flexbox, Bootstrap, Responsive Design, CSS Animations, BEM Methodology

Performance: Core Web Vitals, Lighthouse Optimisation, Code Splitting, Lazy Loading, Asset Optimisation, Page Speed, WCAG 2.1 Accessibility

API Integration: RESTful APIs (JSON/XML), Fetch, Axios, Async State Management, Third-Party Service Integrations

Tools & Workflow: Git, GitHub, Jira, Agile/Scrum, Sprint Planning, VS Code, Figma, Chrome DevTools, npm/yarn

AI Tools: Claude, ChatGPT, Cursor — used for component scaffolding, code review acceleration, and documentation

EDUCATION

MCA – Master of Computer Applications · SGRR Institute of Technology & Science, Dehradun	2014
BSc (IT) – Bachelor of Science in Information Technology · ITM College, Dehradun	2011
12th – Intermediate · Hindu National Inter College, Dehradun	2008
10th – High School · Hindu National Inter College, Dehradun	2006
